The waveforms are generated using the *Cauchy Distribution*:

$$f(x)=\frac{\alpha}{\pi(\alpha^2+x^2)}$$

$\alpha=[0.005,0.006,0.007,0.009,0.011,0.014,0.018,0.023,0.029,0.038,0.048,0.062,0.081,0.104,0.135,0.176,0.228,0.296,0.385,0.500]$

Compositional structure:

Example waveforms (6 ms each):
